PRODUCT SPACE | PRODUCT INTERNSHIP ASSIGNMENT

Making Interview Prep a Reason to Return

From question discovery to a trusted practice-and-progress loop.

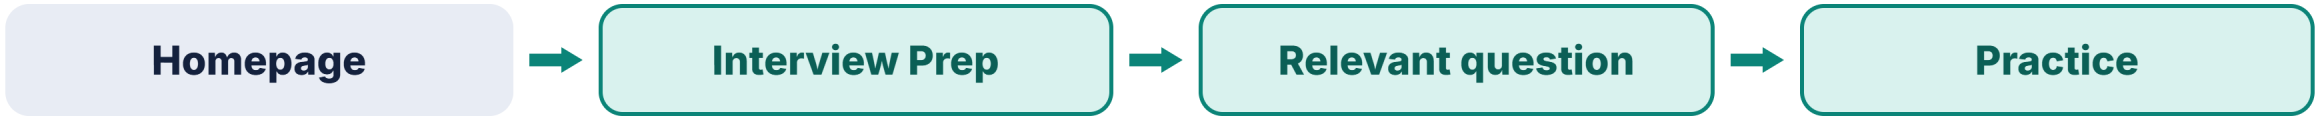

02 · CURRENT EXPERIENCE AND OPPORTUNITY

Interview intent is not prominent at the homepage entry point.

OBSERVED **Today: a candidate who wants interview prep**

PROPOSED **Desired journey**

OBSERVED

On a manual homepage review, courses stood out and an Interview Prep route was not obvious.

TO VALIDATE · USER FRICTION

A candidate arriving to prepare for PM interviews may not know where to begin.

TO VALIDATE · BROADER PROBLEM

Scattered sources, hard-to-assess credibility, and little guidance from answer to practice.

Research question: **what share of visitors has interview-prep intent, and where do they drop out?**

03 · TARGET USERS AND VALUE PROPOSITION

Lead with active PM candidates who need trustworthy guidance.

PRIMARY · HYPOTHESIS

Aspiring or early-career PM

APM applicants and career switchers

Context: preparing for upcoming PM interviews

Need: beginner-friendly, structured answer walkthroughs

Friction: fragmented resources, unclear reasoning standards

SECONDARY

Active company-specific applicant

Context: preparing for a specific role or company

Need: role- and company-specific questions with disclosed provenance

Friction: unsure which questions are relevant or authentic

SECONDARY

Experienced PM

Context: preparing for a transition or specialised interview

Need: advanced, targeted questions with expert context

Friction: generic materials lack depth or relevance

Relevant questions + credible answers + simple explanations + repeated practice = interview confidence

Relevant
role, company, topic

Credible
source and review shown

Readable
clear structure

Actionable
attempt, learn, revise

Ecosystem actors: recent interviewees, qualified reviewers and the content team supply quality content. Scope: PM interviews only.

04 · ADOPTION AND ACQUISITION

Capture intent on-site and where candidates already search.

P0 **Homepage · adoption**

Add Interview Prep to the primary nav and a prominent homepage CTA, plus entry points from courses and assessments.

P0 / P1 **Search · external growth**

Curated, unique company- and role-specific landing pages for organic search. No thin or fabricated SEO pages.

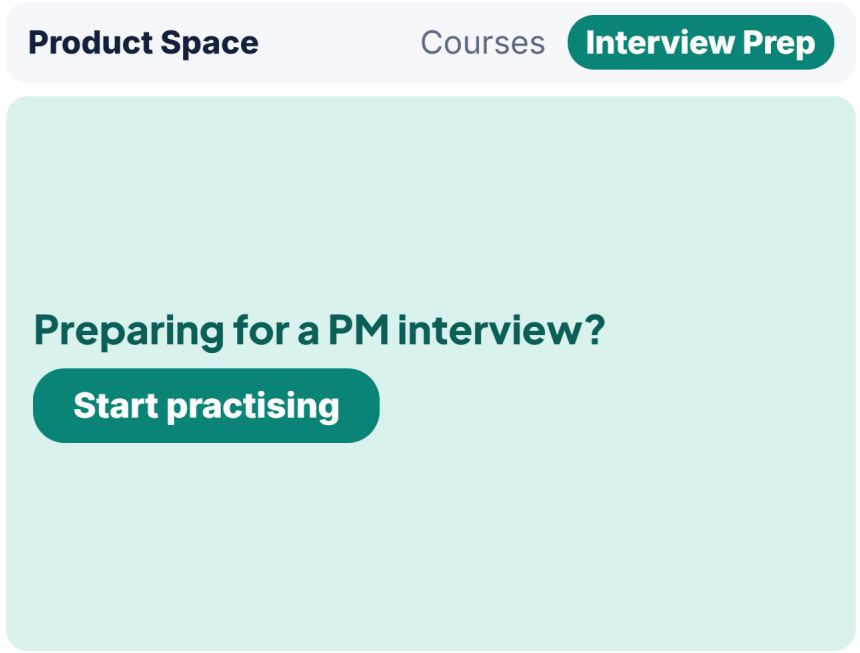

P2 **Shared challenge · share-led**

Shareable challenge cards open a relevant question directly, with a preview before signup.

ONE ACTIVATION STEP

Interview Prep → first meaningful practice

CONCEPTUAL MOCKUP · PROPOSED

METRIC
Homepage-to-meaningful-engagement rate

METRIC
New engaged organic interview users

METRIC
New engaged users from shared links

GUARDRAIL
Course-conversion cannibalization

05 · RETENTION

Give candidates a reason to return: visible improvement.

Practice loop: attempt first, then compare

1. Choose a question
2. Attempt before the answer
3. Compare with expert guidance
4. Mark a weak area
5. Get a suggested next practice
6. Return, loop repeats

CONCEPTUAL UI · ILLUSTRATIVE

Your progress

Topics practised: 3 of 5

Weekly goal: 2 of 3 attempts

Revision queue: 2 questions

Next: [sample question]

Weekly goals

Small challenges, such as 3 meaningful attempts across chosen topics. No forced daily streaks.

Rewards: test later

Points for meaningful practice and revision, redeemable for curated advanced content where economics permit.

Nudges

Permission-based and contextual, such as a new question in a saved company. No generic spam.

CORE METRIC

Activated users practising meaningfully in at least two distinct weeks within 28 days

Prep is episodic: optimise during active preparation, not endless streaks.

06 · CREDIBILITY

Trust should be visible, specific, and earned.

SAMPLE · ILLUSTRATIVE | Verified firsthand interview | Expert reviewed

How would you improve onboarding for a food-delivery app?

1. **Source:** firsthand (sample)
2. **Company, role:** [Company], APM, if verified
3. **Interview date:** [Month YYYY], if supplied
4. **Reviewer:** [Name], [qualification], if consented
5. **Last reviewed:** [date]
6. **Feedback:** helpful? Yes / No · Report a correction

Label system, with public standards

Verified firsthand interview: source confirmed by a defined check

Expert reviewed: answer checked against published criteria

Community submitted: not independently verified

Practice question: illustrative, not a claimed real question

Avoid

- "Asked at [company]" without evidence
- Claiming hires came from Product Space
- Invented scores, logos or testimonials

METRICS

Content meeting provenance standards · helpfulness · correction and flag rates · trust survey

Trade-off: verification workload against contribution throughput.

07 · SUSTAINABLE CONTENT AND QUALITY

Better content drives growth; real experiences replenish it.

Loop 1 · Supply flywheel

1. Prepare on Product Space
2. Interview in real life
3. Invited to share the experience, optional
4. Structured submission
5. Privacy, duplicate and authenticity review
6. Publish with a clear label

Quality-reviewed library

Better discovery and utility

Loop 2 · Quality loop

1. Instrument the funnel
2. Find drop-offs and content feedback
3. Diagnose with qualitative and quantitative evidence
4. Improve the content or the flow
5. A/B test the change
6. Keep or revert

Submission fields company · role · round · date, if safe · question · candidate reflection · source status

Feature view → Question open → Attempt → Compare answer → Next question → Return

METRICS

Approved new interviews per month · submission acceptance · coverage of high-intent topics · freshness · time to review

Safeguard: remove personal data, moderate, and label unverifiable reports.

08 · PRIORITIES, EXPERIMENTS AND ROADMAP

Start with measurable discovery gains, then validate repeat value.

Bet	MVP	Experiment	Primary metric	Guardrail
P0 Discover	Interview Prep in nav and homepage CTA	A/B: current homepage vs visible entry point	Meaningful engagement ÷ eligible homepage visitors	Course enrollment conversion
P1 Return	Attempt-first, progress, weekly goals	A/B vs the current question-reading flow	Meaningful practice in week 2, within 28 days	Usefulness rating, points farming
P1 Trust, P2 Supply	Provenance labels, then structured submissions	Test trust panel; pilot submissions with editorial review	Trust and helpfulness; approved content output	Review backlog, privacy flags

Days 0 to 30

- Baseline analytics
- 5 to 8 candidate interviews (proposed sample)
- Validate the homepage friction
- Ship and test the entry point

Days 31 to 60

- Attempt-first and progress MVP
- Event tracking and retention experiment
- Content provenance standards

Days 61 to 90

- SEO collection pilot
- Selective share cards
- Contributor pilot, then optimise

NORTH STAR

Weekly Meaningfully Engaged Interview Users, split by new vs returning and by channel

The engine is not more views. It is more candidates repeatedly getting useful preparation.
