

PROBLEMS &

User Segmentation

USER SEGMENTATION

1

Zomato's focus on individuals aged 18 to 30, adept in smartphone usage, is a strategic nod to the tech-savvy generation.

Impact of this User segment on Reviews

Zomato targets the young generation who like to experiment on their choice of restaurants. Majority of customers in this segment are students and working professionals, who belong to the dual income households(18-30 age group living in tier 1&2 cities).They are also major users of smartphone and digitally more active.

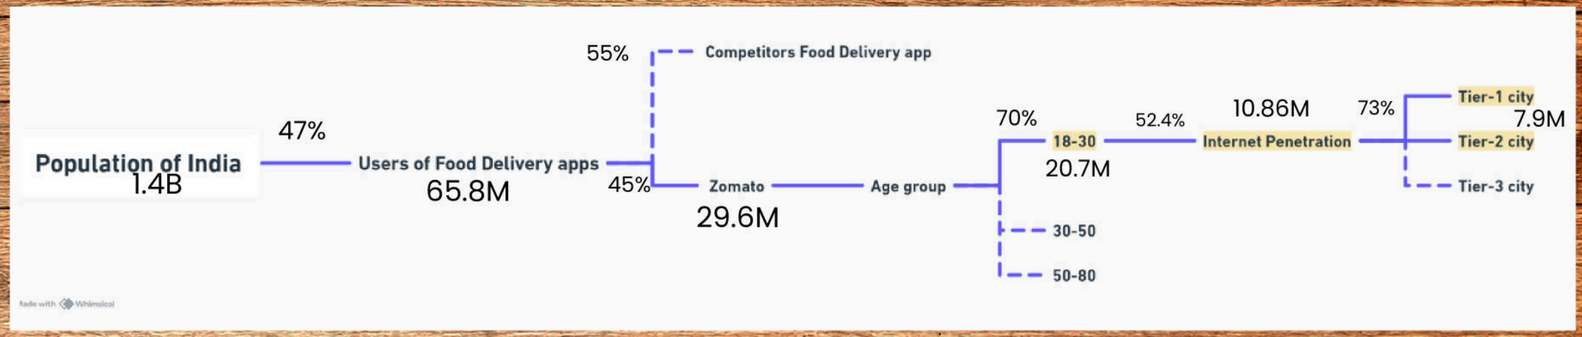

2

Zomato's primary target includes those customers living in Tier 1 and Tier 2 cities who primarily check ratings and reviews before choosing a restaurant.

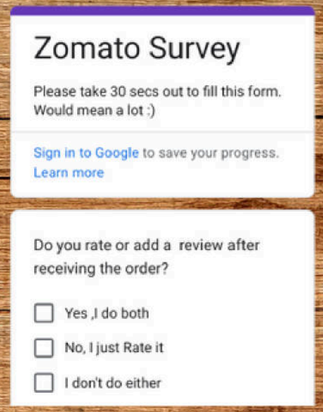

--They comprise of more than 50% of India's population hence will help the number and quality of reviews increase exponentially
--The number of working women has increased . They often spend most of their hours juggling commuting from home and working ;hence increasing the need to refer to a platform and ordering in.

--They dine out with colleagues and friends .In this way, the Zomato app is a go-to tool for restaurant discovery. They rely on the app to check the ratings and reviews of various restaurants and cafes they are interested in

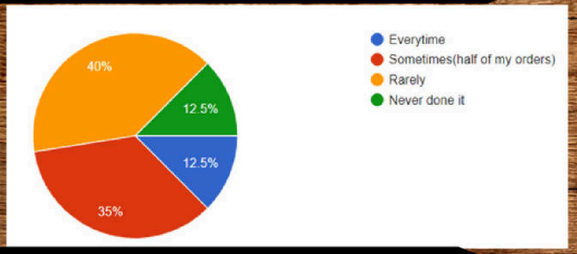

--The online food delivery system is booming in metros and Tier II cities.
-- Younger users are more responsive to gamification, rewards, and incentives, which can be effectively used to encourage them to write reviews. Virality factor also plays a key role

CUSTOMER SURVEY ANALYSIS(41 users)

HYPOTHESIS

- Customers are lazy or occupied to add a review.
- They are not reminded enough.
- No reward system.
- Do not want to have a bad impact on the restaurants/fear.
- Bad UX or technical glitch.

TRUE PROBLEM

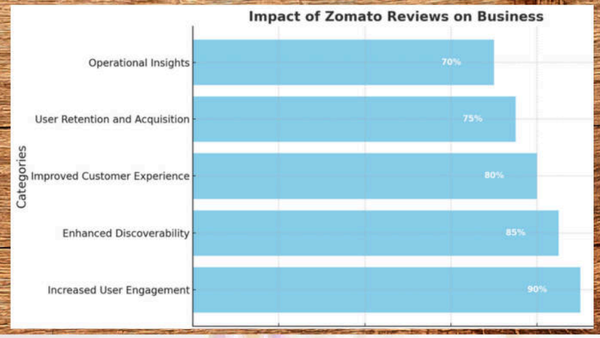

- No incentive for adding a review or rating the order.
- Not enough reminders to put a review.
- Low review completion rate due to lack of ease of adding review.
- Review section not easily navigable.

CUSTOMERS FACING THIS PROBLEM

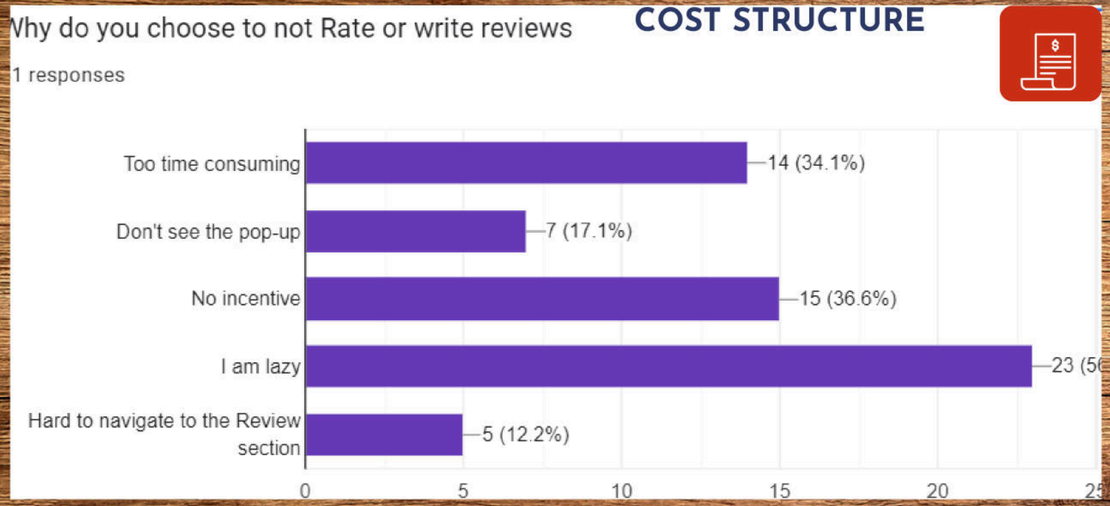

Users between the age of 18-30 predominantly. This involves the college students and working professionals

IMPACT OF SOLVING THIS PROBLEM

- Increased User engagement and retention due to increase in reviews.
- Reviews improve the app's visibility on search engines. This can lead to more organic traffic and potential customers discovering the app
- Higher restaurant bookings due to more insights by the user.
- Increases order completion rate by reducing decision making time.

COST STRUCTURE

IMPACT ON REVENUE STREAM

- If the number of reviews increases by 20%, it could potentially lead to a 10% increase in order volume due to higher trust and visibility.
- Services with positive reviews are more likely to be purchased. Displaying reviews can increase conversion rates by 270% .
